## DID YOU KNOW?

Clean restrooms are more important to restaurant guests than friendly service or visually appealing food.

**78% of guests judge a clean restroom as an indicator of a clean kitchen and good food quality.**

A recent study by the University of Colorado at Boulder found that 19 different types of bacteria are commonly found across all restroom surfaces, including toilet handles, soap dispensers, door handles and sink faucets.

**Foodborne illness affects 1 in 4 Americans each year.**
